PROFESSIONAL SUMMARY

Final-year B.E. Software Engineering student at the College of Science and Technology, Royal University of Bhutan, with hands-on project experience across full-stack development, cybersecurity, and blockchain. Comfortable working across the stack, from building and deploying production-style web apps to running penetration-testing labs and shipping Solidity smart contracts. Co-organizes peer-led technical workshops for first-year students through the College ACM Club, covering Git/GitHub, networking, cybersecurity, and AI fundamentals.

EDUCATION

B.E. Software Engineering

College of Science and Technology, Royal University of Bhutan

Expected 2026

Phuntsholing, Bhutan

EXPERIENCE

Peer-Led Technical Workshops for First-Year Students – College ACM Club

Present

College of Science and Technology, Royal University of Bhutan

Phuntsholing, Bhutan

- Co-organized and delivered two hands-on training sessions for first-year students alongside fellow students.
- Covered Git & GitHub fundamentals, computer networking basics, and cybersecurity foundations.
- Introduced first-years to AI fundamentals and UI/UX design basics using Figma.

PROJECTS

Bhutan Online Auction Platform

Next.js, Node.js, Supabase, Docker – Group Project

- Built a microservices-based online auction platform as part of a 4-person team, containerizing services with Docker for independent deployment.
- Prepared and delivered the project presentation to an academic panel, covering architecture decisions and demo walkthrough.

VerifyX

Blockchain, NDI (National Digital Identity) – Hackathon Project

- Contributed to an NDI-based age and licence verification platform for liquor retail in Bhutan, built for a blockchain hackathon.
- Worked on identity-verification flow design, integrating Bhutan's National Digital Identity (NDI) framework.

LineSkip

Flutter, Firebase – Startup Pitch (IDE303)

- Designed a hospital OPD queue-management app concept targeting JDWNRH, built with Flutter and Firebase.
- Produced the full pitch deck, presenter script, and Q&A preparation for the startup-module presentation.

Petal Notes (Strawberries & Notes)

Next.js, Clerk, MongoDB Atlas – Personal Project

- Built and deployed a personal notes application with authentication (Clerk) and cloud data storage (MongoDB Atlas).

TECHNICAL SKILLS

Languages	Python, JavaScript, C/C++, Solidity, SQL
Frameworks	React, Next.js, Node.js, Express.js, Tailwind CSS
Developer Tools	Git & GitHub, Docker, Kubernetes (kind), Postman, Kali Linux
Databases	MongoDB, PostgreSQL, Redis
Security & Cloud	Burp Suite, Metasploit, ELK Stack / SIEM, AWS (IAM, LocalStack)
